

The cleanest, most convenient and healthiest hardwood floor finishing system available, the Bona Environmental Choice System™ features our innovations of water-borne finishes and dust containment sanding equipment.

The Bona Environmental Choice System™ represents products and systems for each step of the hardwood floor finishing process and for hard surface floor care. These products meet or exceed all state and federal clean air quality standards and reflect our commitment to personal health, indoor air quality and the environment.

AMC-Flooring Services is committed to using the most advanced flooring systems available.

Hardwood Flooring Services

Total Flooring Services

Introducing Gerry Disque, our flooring expert. Gerry has ten years experience in all phases of the flooring process. He has successfully completed projects in high profile communities, like The Peninsula, Wolfe Point, and country club developments like Kings Creek and Rehoboth Beach Yacht and Country Club

His local knowledge will be a great asset to regional contractors.

Beginning with specifications and budgeting and working through to ordering materials and installation,

Gerry and his crew at Atlantic Millwork & Cabinetry Corp. will provide the total flooring package.

AMC Flooring will offer a variety of flooring options: laminated, hardwood, engineered and borders. The list of services will be controlled in-house and include custom finishes, matching existing finishes, hand-made medallions and the latest in environmentally friendly products and dust-free sanding.

Gerry's willingness to work with other trades and his flexibility with general contractors and homeowners will be a great asset to any new construction or remodeling project.

Sanding hardwood floors use to be a dust nightmare. Not anymore.

Airborne wood dust, a known carcinogen, is a jobsite hazard that is completely unnecessary. BonaKemi USA pioneered dust containment for the hardwood floor finishing industry in 1995 and have continued to develop innovative solutions such as the trailer-mounted Atomic DCS®.

With Bona's dust containment systems, there's no airborne dust generated to permeate a home or business. It's a healthier environment to work in every day and cleans up what used to be an extremely dusty process.

AMC Flooring is committed to a DUST FREE process and has ordered a Bona® Atomic® Trailer with the trailer-mounted Atomic DCS® system, having a gas-powered engine outside of the customer's home, significantly increases airflow. The result is a dramatically more powerful system, providing evacua-

tion of the airborne dust that is generated from the entire sanding process.

Bona® Atomic® Trailer includes:

- Atomic DCS with 27-HP water-cooled, Kawasaki engine. Trailer dimensions: 6'W x 14' L
- Hose reel with 300 ft. capacity
- 200 ft. 2" I.D. vacuum hose for sander
- 100 ft. 1.5" I.D. vacuum hose for edger/buffer
- 15 ft. 1.5" I.D. vacuum hose with detailing end attachment.

Call Gerry today to learn more about our total flooring services. AMC-Flooring Services is committed to timely services and no call backs.
